

Capacity to Move Mountains...

Snow Scraper

8', 10' & 12' MODELS

MODEL NUMBER	LOADER SERIES	UNIT CAPACITY
SBB-8	20/40	46 cu. ft.
SBB-10	40/70	58 cu. ft.
SBB-12	40/70	80 cu. ft.

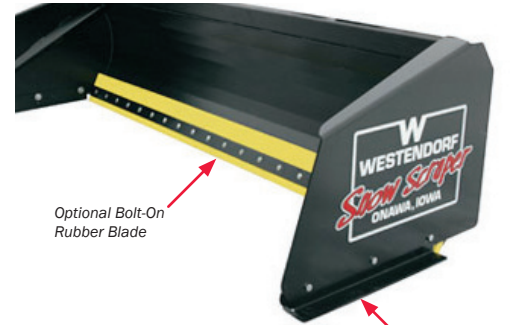

Inspired by our legendary Landscaper™, the Snow Scraper is commonly referred to as a containment plow, snow pusher or box style plow. It is designed to mount on the front of your loader or skid-steer to move snow quickly from areas such as driveways, streets, parking lots, and commercial lots without leaving windrows. This versatile implement isn't just limited to clearing snow and ice; it is also useful in capturing manure, silage, grain, mud, refuse, waste water and other materials.

- Fully welded structure made with high strength steel and is reinforced for heavy use.
- Balanced distribution of force to maintain the power of the tractor and loader while working.
- Smooth blade and rib-free interior so material does not stick to the surface, and it is curved to roll material forward into a large heap to move more material longer distances without leaving windrows.
- Hardened steel cutting edge breaks up hard packed snow and ice for a clear surface.
- Angled side plates are double reinforced for stability and also rounded in the front to assist the Snow Scraper over unseen objects such as curbs and uneven surfaces.
- Seven replaceable hardened steel shoes resist wear and are angled to further help the implement ride over unseen obstructions.
- Standard with Westendorf's NEW COMBINATION Snap-Attach™ adapters, skid-steer or pin type adapters are available as well.
- Options include 8', 10' and 12' Rubber Blade Kit; Bolt-On Skid Plates and 3-point mounts.

REINFORCED

We've highlighted our focus on strength for **LONG LASTING RELIABILITY.**

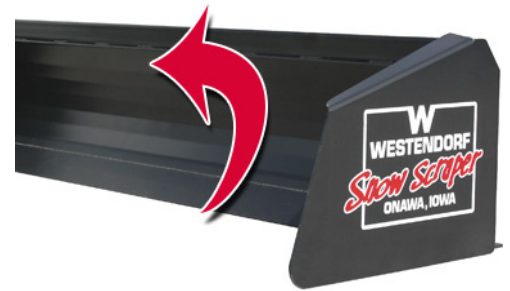

Optional Bolt-On Rubber Blade

Optional Bolt-On Skid Plate

RIDEABILITY

EXTRA STABILITY for a smooth ride over unseen obstructions.

MASSIVE CAPACITY

The shell rolls material in a heap to **CLEAR MORE in LESS TIME.**

Shown with optional dual series adapter

TIME-SAVING VERSATILITY

Westendorf Snap-Attach™ connects quickly for **INCREASED PRODUCTIVITY.** Adapts to other brand loaders and skid steers.

100 Series Snow/Scraper for COMPACT LOADERS

The Westendorf 100 Series Snow Scraper™ is a durable snow pusher for the Westendorf 100 Series loaders that are capable of clearing more snow, ice or slush faster than a traditional bucket or blade. In addition to snow, the Snow Scraper™ is also useful for clearing feedlots of manure, parking lots of snow, pushing grain piles and much more.

QUICK ATTACH

Attaching the 100 Series Snow Scraper™ is quick and easy. You can also change to another attachment in just minutes. That saves you time and money.

DOUBLE REINFORCED

This scraper has double reinforced wings on each side to capture snow, and keep it in front of the attachment. This allows you to move more material in less passes without creating windrows.

DURABLE SHELL

Smooth and rib-free so material does not stick to the surface. The arrow illustrates how it is curved to roll material forward into a large heap to move more material longer distances. The hardened steel cutting edge breaks up hard packed snow and ice for a clear surface.

60" & 72" MODELS

MODEL NUMBER	LOADER SERIES	UNIT WIDTH
SBB-5	100	60 Inches
SBB-6	100	72 Inches

72 in. & 96 in. V-Plows for ALL LOADERS

The Westendorf V-Plow is patterned after the snow plows you see on the highways, designed to actually roll and throw the snow away and not just pile it up in front of you. The 72" model fits the 100 Series and TA-25 Westendorf loaders. The 96" V-Plow works with most of the larger Westendorf loaders in the WL Series, TA Series, XTA Series, and Custom Contour Series. The Westendorf V-Plow can also easily be adapted to fit other brand loaders and skid steers.

DURABLE SHELL

The Westendorf V-Plow's one-piece construction of high strength steel ensures maximum durability because it is not prone to weld fractures.

REINFORCED

The V-Plow shell is backed by a high-strength reinforced steel frame that absorbs the resistance of heavy packed snow.

RIDEABILITY

The V-Plow's feet raise and lower to determine the height of the V-Plow blade and make sure that the back of the blade does not dig into the ground.

72" & 96" MODELS

MODEL NUMBER	LOADER SERIES	UNIT WIDTH
VP-72	100/20	72 Inches
VP-96	20/40/70	96 Inches
